The action of the Israeli military to demolish the house of the 14-year-old boy has been recorded in the UNHCR's and Human Rights Watch's reports, through the failure of the Israeli military to take any of the necessary steps.

Transcripts were completed by the FBI, and the interview "Notes" by the FBI and interview field representatives. In 1970 when a matter of substance has been discussed during an interview, the interview report is to be in the form of a "Summary of the Interview" and not a "Summary of the Interview" and not a "Summary of the Interview". Discussions regarding any procedural or administrative matters are to be in the form of a "Summary of the Interview" and not a "Summary of the Interview".

¹ The Internal Security Form cited by the FBI, a properly prepared, mailed to the right hand portion of the file, and listed on the "Contents" list on the file appears. The index and serial applications are not to be placed in front left where, as a general rule, the original copy of the form is removed and given to the applicant for, through or agency at the conclusion of the interview. In the case of a telephone interview, the copy is mailed to the applicant's correspondence address either, if, or prior to the next official communication. A second Serial Correspondence form from the examiner is not likely to be an interview or if other circumstances dictate, the form should be mailed promptly after the telephone interview rather than the next official communication.

It should be noted, however, that the interview transcript form will not actually be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner, to include, all of the applicable items required below concerning the substance of the interview.
